

Application No. 09/888,554
Amendment Dated January 22, 2009
Reply to Office Action of October 3, 2003

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 2-3 (canceled)

Claim 1. (Currently amended): A An electronic retail product purchase checkout-counter product purchase and transaction divider comprising:

- a) An elongated hollow body having sidewalls, having access openings, the interior being adapted to receive customer and store interactive electronic components.
- b) The checkout counter divider will be located at the point of purchase counter and replace non-electronic counter checkout dividers with new and improved customer interactive electronic checkout counter dividers.
- c) The checkout counter divider contains customer and store interactive electronics and software to perform advertising, marketing and retail functions. The electronics, software and components will be comprised from standard off the shelf components. The software will contain unique programming as to the checkout dividers installed components.
- d) The checkout counter divider can vary in size and shape to accommodate the checkout counter size requirements and various types of electronic components inserted.

Claim 2. (new): The checkout counter divider electronics contains a two-way wireless communication system for wireless communication of customer input and returned file data information generated from an in store checkout counter divider management computer. The checkout counter divider will have a unique individual identification software and electronic assembly unit number for remote identification, tracking donations, sales transactions, store register computer interaction and advertising management. Each checkout divider will have an individual Identification number for remote identification or programming.

(new): The checkout counter divider management computer will be located in the store and be connected to a wireless transmitter and receiver system and also be connected to the internet or wireless cell phone network, checkout counter divider management computer and interact with the in store register computer, product and customer data files to perform processing of a transaction. The checkout counter dividers will be capable of various options of charity donations, display remotely generated advertising, perform sales transactions, bar code scan discount coupons or customer store cards and transmit or generate product coupons. The checkout counter dividers can be managed, read, programmed and controlled remotely by way of the Internet, wireless phone service and they are controlled by the checkout counter divider management computer. The checkout counter divider will have a unique individual identification software and electronic assembly unit number for remote identification, tracking donations, sales transactions, store register computer interaction, individual programming and advertising management.

- a) The host checkout dividers computer will communicate with the store point of purchase register computer and files to send and receive any customer transaction files, process charity donations, generate advertising and receive, transmit or generate product coupons.
- b) Advertising can be sent in real time to the checkout dividers and displayed on the visual component by way of the Internet or a wireless phone network and interact with the in store checkout divider computer.
- c) Unique identification number included in the divider software and physically on the checkout divider electronic insert will identify the dividers. This will allow remote sorting of the individual checkout dividers for targeted advertising programming and transaction data management.
